DETAILED ACTION

Reason for allowance

1. The following is an examiner's statement of reasons for allowance: None of the prior art of record alone or in combination teaches or fairly suggests applicant's claimed invention. Particularly, the claimed details of the lamp assembly of claim 1 further including "a slit defined through the tubular body; and an extension extending from the tubular body along the slit."

The prior art of record most similar to applicant's invention is taught by Camarota et al. Camarota et al discloses two brackets and two shade holders 13 attached respectively to the brackets. A shade 17 is mounted between the shade holders. A tubular body is made of an opaque material 261 and having an axis and two open ends attached respectively to the shade holders. A socket with an illuminating element 62 is attached to each shade holder, and the illuminating element mounted in a corresponding one of the open ends of the tubular body of the shade. However, Camarota et al doesn't teach or fairly suggest "a slit defined through the tubular body; and an extension extending from the tubular body along the slit." as claimed in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Brandes et al, Jao and Yamamota et al disclose illuminated devices which are similar to applicant's invention.
